

Job Opening Project Controls Engineer

What are you involved in?

- You will be deployed on large multidisciplinary projects in Belgium and optionally abroad (only if you are interested, this is not an obligation) within the world of engineering, construction, chemistry, petrochemistry and pharma.
- Sometimes you work on a large tender for an offshore wind farm, other times you are deployed in the progress of a project for a data centre or you prepare a claim for a large infrastructure project. Another team focuses on turnarounds and shutdowns within the oil & gas, chemical & petrochemical industries.
- Thanks to your social skills, you know how to provide the planning with the necessary information, after which you provide the team with the analytical progress of the project and you monitor the scope like no other.

Ingeniva provides project controls and contract management support on complex projects. Expertise from experienced and knowledgeable project controls and contract management specialists is essential to ensure that the design of the project controls disciplines meets the needs of our clients.

Our engineers are highly skilled and work closely with your project teams, providing their experience and know-how for the management of a multidisciplinary project.

You have a degree as engineer, accurate and know better than anyone how to turn a combination of different projects into a clear planning.

You make the difference with your eye for detail and analytical skills.

'Complex' does not appear in your dictionary and you can turn any challenge into a successful opportunity.

You will work in a strong international team with respect for the different cultures and broaden your horizons.

Our offer

We really appreciate your efforts, so here's what's in return:

- An excellent work/life balance
- A full option lease car
- 32 days holiday, almost all free to take
- Net remuneration
- Hospitalization insurance
- Group insurance
- Meal vouchers and Eco vouchers
- GSM/laptop
- An attractive bonusplan
- A foreign training program linked to a personal training plan.
