

Job Opening Project Controls Manager

Given our strong growth and ambitious businessplan, we are looking for a Project Controls manager/coach based in Belgium or the Netherlands.

What are you going to do?

- You will coach our team in the latest trends in project management
- You will be involved in pre-sales and consulting assignments
- You will be deployed on large multidisciplinary projects in Belgium and optionally abroad (only if this may interest you, this is not an obligation) within the world of engineering, construction, chemistry, petrochemistry and pharma.
- Thanks to your social skills you will be able to provide the planning with the necessary information after which you will provide the team with the analytical progress of the project and monitor the scope like no other.

INGENIVA provides project controls and contract management support on complex projects.

Our engineers are true analysts and usually work on location at our customers in the Benelux. As a company we are absolute pioneers in the new way of working. Working from home is very well established in which trust is our core value. So there is a great deal of flexibility when it comes to filling in your own schedule as long as deadlines and intended results are met.

- You are a commercial or construction engineer by education who wants to be involved in various multi-disciplinary projects.
- You are a top-level planner and organizer and you work very accurately.
- You are also strong in analysing and visualising processes.
- With a master/bachelor working and thinking level and at least 5 years of experience in project management you are ready for your next step.
- You are not afraid to take decisions and communicate this to your customer.
- You have knowledge of PPM tools such as Primavera, MS Project, Tilos, Deltek, etc.
- In addition to English, you also masters another national language, Dutch or French.

Our offer

We really appreciate your efforts, so here's what's in return:

- An excellent work/life balance
- A full option lease car
- 32 days holiday, almost all free to take
- Net remuneration
- Hospitalization insurance
- Group insurance
- Meal vouchers and Eco vouchers
- GSM/laptop
- An attractive bonusplan
- A foreign training program linked to a personal training plan.
